##########STEPS TO EMULATE#######################################

-> Follow this tutorial
https://azeria-labs.com/emulate-raspberry-pi-with-qemu/

-> in the initialConfig
bash run.sh

-> in the emulator
as RSA.s -o rsa.o

ld rsa.o -o rsa

./rsa

-> for debuggin

gdb rsa
##########PARAMS###\
-> The params.txt files has the following format

p,q,op

-> Where p and q must be prime or you get an error message
-> op:

- 0 = encrypt
- 1 = decrypt

##########COMANDS###
layout asm   # Mostrar el código
nexti   # Próxima instrucción
next   # Terminar ejecución
stepi   # Proximo step
info registers #info de los registers
